

Invitation for the Global Next Generation Network Presentation Showcase at CIGRE Paris Session 2022

This is an invitation to all CIGRE National Committees (and individual CIGRE members from countries that do not have a National Committee) to participate in the fifth Global Next Generation Network (NGN) Presentation Showcase at CIGRE Paris Session 2022.

The showcase was originally initiated by the CIGRE-UK NGN, aiming at providing a good development and networking opportunity for global NGN members to showcase their work in this excellent international platform. Through the event, it was also expected to enhance international collaboration between NGN groups and increase NGN member participation in the Paris Session, while driving sustainable membership growth for CIGRE by engaging with potential future experts in the industry.

The first four global NGN presentation showcases were held at the CIGRE Paris Sessions in 2016 and 2018, the e-Session in 2020 and the Virtual Centennial Session in 2021 and all four turned out to be great successes: 22 NGN members from 14 countries got the chance to present their work in 2016, 31 NGN members from 21 countries got the chance to present their work in 2018, 33 NGN members from 23 countries got the chance to present their work in 2020 and 29 NGN members from 19 countries got the chance to present their work in 2021. With the positive feedback received from participants, Study Committee (SC) Chairs and audiences, it is planned to hold the fifth event at CIGRE Paris Session 2022.

All National Committees (and individual CIGRE members from countries that do not have a National Committee) that are interested in participating in this event, please refer to the document “Guidelines for Global Next Generation Network Presentation Showcase at CIGRE Paris Session 2022” for more details, or get in touch with the NGN Showcase Coordinator through the following email address: giaco013@umn.edu.
